PROFESSIONAL SUMMARY

Software Engineer specializing in **mobile development**, **AI-powered systems**, and **data processing**. Experienced in building and publishing production Flutter applications, developing OCR and computer-vision pipelines in Python, and working with relational databases and ETL workflows. Hands-on across software architecture, backend integration, and cross-platform application development.

TECHNICAL SKILLS

Programming	Python, Dart, Java, JavaScript, TypeScript, C, SQL
AI & Data	OCR, Computer Vision, PyTorch, OpenCV, EasyOCR, TensorFlow Lite, Pandas, NumPy, ETL
Mobile & Frontend	Flutter, Android, Angular, React.js, HTML, CSS
Backend & APIs	FastAPI, Spring Boot, Express.js, REST APIs, SQLAlchemy, JDBC
Databases	SQL Server, Supabase, Firebase Firestore
Tools	Git, GitHub, Figma, Power BI, Android Studio, LaTeX, Agile/Scrum

EXPERIENCE

- Final-Year Project (PFE) — OneTech** 2026 — Tunisia
- Designed and built **Apex OCR**, a production-ready full-stack system for extracting handwritten and printed data from French industrial inventory documents.
 - Developed a **FastAPI** backend and an **Angular** frontend with a guided upload flow, live progress tracking, and a match/no-match review interface.
 - Trained a custom **CNN digit classifier in PyTorch** reaching 99.6% test accuracy on handwritten digits, using multiple public datasets.
 - Built a multi-stage Python pipeline (preprocessing, segmentation, recognition) with parallel page processing using **OpenCV** and **EasyOCR**.
- Summer Intern — SAGEMCOM** July 2024 — Tunis, Tunisia
- Built an **ETL pipeline** to extract, transform, and load business data.
 - Developed BI workflows and **Power BI** dashboards using **SQL Server** and **Python (Pandas)**.
 - Automated parts of the data preparation and reporting process in an industrial context.

PROJECTS

- SalahMate — Islamic Mobile Application** Flutter, Dart, Supabase
- Designed and published a production cross-platform app on [Google Play](#): prayer times, Quran reading and audio playback, adhkar, Qibla compass, Hijri calendar, and customizable notifications.
 - Implemented multilingual support for Arabic, English, French, Urdu, Bengali, Turkish, and Indonesian.
 - Built responsive UI scaling, dynamic themes (light, dark, black), and battery-optimized background services.
 - Implemented on-device prayer calculations, Qibla direction, and notification scheduling.
 - Maintained and iterated on the app through multiple production releases.
- PlantCare — IoT & AI Smart Greenhouse** Flutter, Firebase, BeagleBone, TensorFlow Lite

- Built a smart greenhouse system integrating BeagleBone sensors, a Flutter app, and a Firebase backend.
- Implemented live visualization of temperature, humidity, light, and pressure, with configurable thresholds and alerts.
- Integrated a **TensorFlow Lite** image-classification model for plant disease detection.

Flag Frenzy — Gamified Educational App Flutter, Dart, Supabase

- Developed a quiz app with multiple game modes, achievements, daily rewards, and a coin economy.
- Implemented Google Sign-In, cloud profile synchronization, a progression engine, and ad monetization.

EDUCATION

2023 – 2026 **Engineering Degree in Software Engineering**, Faculté des Sciences de Bizerte (FSB), Université de Carthage
Bizerte, Tunisia

CERTIFICATIONS

- AI Engineer for Developers Associate — DataCamp

LANGUAGES

Arabic	Native
